SAWQUIP

The SBSE30 Firewood Bench Saw stands as a highly efficient solution for timber cutting applications, eliminating the labor-intensive use of chainsaws and associated maintenance. Tailored for firewood cutters, contractors, and property managers, this powerful tool ensures swift and effortless task completion. Fitted with a 750mm TCT blade, the SBSE30 guarantees precision and reliability, solidifying its position as an invaluable addition to any cutting operation. Elevate your firewood processing with the SBSE30 - efficiency meets ease with the electric start advantage.
