EXCAVATOR FLEXCUT SAW

The SAWQUIP FlexCut Saw range provides a versatile excavator- mounted cutting solution for a wide variety of applications and industries. Designed to suit your specific cutting requirements, each FlexCut unit is configured with the correct blade type and blade speed to deliver efficient, controlled performance for the task at hand. The FlexCut range can be set up to cut a broad range of materials:

- **Rock** (Soft + hard rock types)
- **Concrete** (fibre-reinforced and reo-reinforced)
- **Asphalt**
- **Plastics** (including HDPE)
- **Metals**
- **Timber**
- Other specialist materials

FlexCut saws can be supplied with an integrated **water coolant system**, providing effective blade cooling and dust suppression to improve cutting performance, extend blade life, and enhance on-site safety.

The SAWQUIP **FlexCut Rock Saw** is a high-performance excavator attachment designed for cutting through concrete, asphalt, and rock with ease. Ideal for roadworks, demolition, trenching, and civil construction, it delivers clean, precise cuts even in tough site conditions. The saw can be fitted with different blades to suit various materials, ensuring maximum efficiency and performance across a wide range of applications.
