

HYDRAULIC EXCAVATOR WOOD SAW - LogRipper

STURDY GUARD PROTECTION

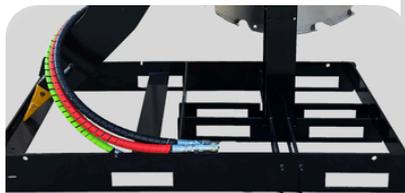

STANDARD HITCH SUITS MOST EXCAVATORS

TUNGSTEN TIPPED TIMBER BLADE

CASE DRAIN LINE REQUIRED FOR LOGRIPPER X12, X15, X18

STAND WITH FORKLIFT POCKETS FOR SAFE LOADING/UNLOADING

TALON ARM

FIREWOOD - HEDGING - LOPPING - RIPPING

LAND MANAGEMENT - ARBORISTS - CONTRACTORS - WOODCUTTERS

PROUDLY

SAWQUIP

Excavator LogRipper Saw

Engineered for efficient timber processing, the SAWQUIP LogRipper is a purpose-built excavator wood saw designed to handle multiple tasks with a single, integrated attachment.

- **Ripping** - breaking down timber lengthways
- **Cross-cutting** - into rounds
- **Limbing** - branches

Featuring a fixed LogTalon arm, the LogRipper allows operators to roll, separate, position and cut timber with complete control from the cab. This design improves workflow, reduces downtime and eliminates the need to change attachments between operations.

ITEM	SUITS	BLADE	CUT SIZE	OPERATING PRESSURE	REQUIRED FLOW (LPM)
X07.TH	2-5T	750 MM	300 MM	2040 PSI	30-50
X09.TH	3-5T	900 MM	370 MM	2040 PSI	50-60
X10.TH	5-8T	1000 MM	420 MM	2540 PSI	60-65
X12.TH*	8-25T	1220 MM	520 MM	3050-3600 PSI	100-120
X15.TH*	10-25T	1530 MM	650 MM	3050-3620 PSI	110-130
X18.TH*	13-30T	1830 MM	800 MM	3050-4200 PSI	120-140

**Case drain line required*
